-

PROJECTS & EXPERIENCE

Kyrie Studios, Remote/Gameplay Programming Intern

November 2023—Present 2024

- ❖ In Unreal Engine 5, worked with a team of 25 others to create Project Chaos, a thrilling party-style battle royale
- ❖ Implemented unique NPC and animal behaviors, knocking rolling barrels, cannons, and explosions

Visteon Corporation, Belleville, MI/Product Development Intern

May 2023—August 2023

- ❖ Explored the benefits of using Unreal Game Engine for automotive HMI through a Proof of Concept project
- ❖ Collaborated with a cross-functional team in the Godot Game Engine to implement features and optimize performance in order to investigate potential options to enhance the user experience

Wolverine Soft Studios, Ann Arbor, MI/Programming Lead

April 2023—April 2024

- ❖ Maintained Git Repository and handled merge conflicts that were encountered
- ❖ Oversaw a team of 8-13 students. Held weekly meetings, office hours, and planned meetings with an industry advisor
- ❖ From August 2023-April 2024, developed an RPG in the Unity Game Engine with a team of 40 students
- ❖ Created the prototype of the game and the architecture of all basic functionality: a battle system similar to that found in the popular title *Undertale*, input and movement scripts, a dialogue system, and a quest system
- ❖ From April 2023-August 2023, collaborated with a team of 30 students to create a captivating “2.5D” game in the Unity Game Engine which emulated the gameplay mechanic of the popular title *Nova Drift*
- ❖ Created the prototype of the game and the architecture of all basic functionality: an encounter system, input and movement scripts, and enemy controller and weapon abstract classes to build on

Project Drift, Ann Arbor, MI/Programmer

January 2023—April 2023

- ❖ Through Wolverine Soft Studio, collaborated with a team of 40 students to develop a 2D game in the Unity Game Engine as a case study of the renowned title *Hyper Light Drifter*
- ❖ Member of the level squad, created the encounter system, cutscene manager, and aided with art integration

Granny's Day Off, Ann Arbor, MI/Design Lead

October 2022—December 2023

- ❖ Team of 5 developers and a musician, created a 3D, 1v1 3rd person shooter in the Unity Game Engine
 - ❖ Responsible for the initial designs and concept, NPC and Police's movement behavior, post-processing, art and animation integration. Created the Player, NPC, and Player House 3D models in Blender
-

48 HOUR GAME JAMS / TEAMS OF 3-5

Follow the Flock/Wolverine Soft's Shammy Jam/Awarded Best Polish & Aesthetics

March 2022

- ❖ Responsible for character sprites, background images, and musical track

BEE-01/Wolverine Soft's Turkey Jam

November 2022

- ❖ Implemented encounter system, enemy controller scripts, health scripts, and damage scripts

Getting to the Root of It/Global Game Jam

February 2023

- ❖ Responsible for all art integration, camera movement, and health scripts
